

1. Make a temporary folder on your HDD as the location to save the downloaded self-extracting file.
2. Click here to download the uninstall tool. Please note that the uninstall tool is intended for local interface users.
3. The Brother End-User License Agreement will appear. If you agree to the terms, click **I ACCEPT**.
4. Download the file to the temporary folder created in Step 1.
5. Once downloading is complete, open the folder and double click **DELINF.EXE** to extract it.
6. "ZIP Self Decompression" will appear. Click **DECOMPRESS**.
7. "The decompression process was successful." will appear. Click **OK**.
8. A folder will be created in the temporary folder created in Step 1.
9. Open the folder and double click "**BrRemPnP.exe**". "Brother Device Driver Uninstall Tool" dialog box will appear.

10. Select your model name from the pulldown list and click **OK**.

11. "The uninstall has been completed successfully." will appear. Click **OK**.
